ECLIPSE DOM
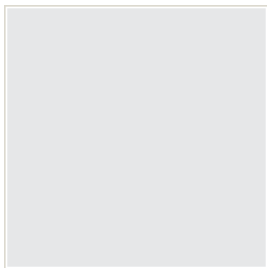

1. Title / Logo Design

The Eclipse Dom logo features a black circular emblem containing a stylized eye above an open hand. The wordmark "ECLIPSE DOM" is rendered in all-caps, bold sans-serif typography.

- Primary version: black logo on light gray background

- Alternate version: white logo on black background for dark mode or reverse treatments

2. Typography

- **Headings :** Montserrat Bold, ALL CAPS
  Used for section titles and callouts

- **Body Text :** Roboto Regular, size 16–18px
  Color: #D3D3D3 for dark backgrounds or #1B1B1B for light backgrounds

- **Emphasis:** Red text (#E50914) or bolded phrases used for warnings or interactive content
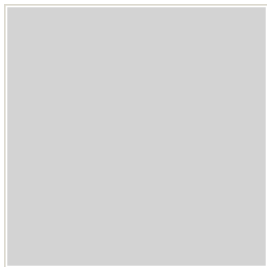

3. Color Scheme

Primary Background
#E6E7E8
Light gray subtle document-like tone

Primary Logo/Text
#000000
Black for logos and headings

Accent Color
#E50914
Warning/redacted content highlight

Secondary Text
#D3D3D3
Light gray body text (for dark background use)

4. Navigation Link Design

To reflect the restrained and secretive tone of the Eclipse Dom brand, navigation links are designed to be clean, minimal, and unobtrusive.

- **Default State:**
  Navigation text appears in a dark charcoal gray (#222222) using Roboto Regular at 14–16px. There are no underlines or icons, preserving a structured and refined look.

- **Hover Interaction:**
  Instead of using abrupt color changes, subtle visual cues are used to indicate interactivity:

  - A soft text-shadow glow

  - A thin underline that fades in smoothly

  - A slight scale-up effect (approximately 1.05x)

- These effects gently guide the user's attention without disrupting the immersive tone of the site.

- **Active State:**
  The currently active link may be displayed with slightly bolder weight or a slightly deeper shade to help users recognize their position within the site.

This approach maintains visual restraint while supporting clear navigation and a consistent user experience.
